

Handmark Closes Series B Funding

-- market momentum draws finance from Motorola Ventures as well as Series A investors --

KANSAS CITY, Mo. (Sept. 7 2006) — Handmark, the leading on-device portal company, today announced that it has closed \$5 million in Series B funding led by Motorola Ventures, the strategic investment arm of Motorola, Inc. (NYSE: MOT), as well as participation from Series A investors Apax Partners, Borealis Ventures, Village Ventures and Hanna Capital Management.

The funding will be used to accelerate Handmark leadership in the fast-growing on-device portal category, including expansion of Handmark® Pocket Express™ content and infotainment services. Pocket Express is the Handmark flagship product and the market's favorite on-device portal — installed on more wireless handsets in the U.S. than all other independent mobile portals combined. Funding will also be used to advance international expansion in Europe and Asia.

"Motorola's decision to invest in Handmark was driven by its outstanding on-device portal that starts, ends and wins with the consumer," said Warren Holtsberg, corporate vice president of equity investments at Motorola, Inc. "Handmark's compelling Pocket Express application is already available for the extremely popular MOTO Q™."

"Next-generation content delivery will further accelerate the consumer adoption of information and entertainment on mobile devices," said Christy Wyatt, vice president of ecosystem and market development for Motorola Mobile Devices. "We believe it is one of the key components of the mobile device ecosystem and consumer experience."

"Handmark is thrilled to have Motorola as an investor. It invented the mobile marketplace and continues to lead with best-selling designs that delight customers worldwide," said Handmark CEO August Grasis III. "With this investment Handmark will accelerate the leadership position of Pocket Express by expanding the variety and availability of high-value content and by making it available worldwide."

###

About Handmark

Handmark is a global leader in the development and distribution of mobile content solutions. Pocket Express wireless on-device portal service offers consumer-friendly access to news, reference and infotainment content on mobile phones as well as BlackBerry®, Palm® Treo®, motorola Q™, and other Windows Mobile wireless handhelds. The company holds key mobile content distribution patents including Java-based push technology for wireless devices; has technology and distribution relationships with CNN International, The Associated Press, Oxford University Press, Hasbro, MobiTV, TV Guide, JAMDAT Mobile and Saga Survey as well as all major U.S. mobile

operators; and dominates the market for mobile software sold through retail channels. Handmark has R&D facilities in Gothenburg, Sweden; Kansas City, Mo.; and Dallas, Texas, with sales offices in Kansas City; San Francisco; Stockholm, Sweden; and London.
